SUMMARY

BCA graduate interested in software and web development, with hands-on experience gained through academic projects, internship and self-learning. Worked with Python, Java, JavaScript, React, and SQL while building applications end to end. Familiar with SDLC, testing, debugging, and problem-solving, with a focus on teamwork and continuous learning.

EDUCATION

Bearys Institute of Emerging Sciences, Mangalore, Karnataka | 2022 – 2025

Bachelor of Computer Applications (BCA) | CGPA: 9.43

EXPERIENCE

Web Development Intern | CodSoft (Remote) | August 2024 – September 2024

- Worked on frontend development tasks focused on building responsive and clean user interfaces.
- Designed and developed a landing page and a personal portfolio website using HTML, CSS, and JavaScript, with an emphasis on page structure, consistent styling, smooth navigation, and user experience across different screen sizes.
- Followed frontend best practices including responsive layouts, reusable styles, and basic interactivity.

PROJECTS

Desktop Virtual Voice Assistant | April 2025 – May 2025 | [GitHub](#)

- Developed a Python-based desktop voice assistant that allows users to perform system tasks using voice commands.
- Implemented over 35 features including application control, web browsing, reminders, note-taking, media control, and AI-based responses.
- Reduced manual typing and navigation effort, improving task execution speed and user productivity by approximately 20%.
- Conducted testing and debugging of core Python modules to enhance the accuracy, reliability, and performance of AI-driven text and audio responses.
- **Technologies Used:** Python, SpeechRecognition, PyAudio, pyttsx3, Google AI API, PyWhatKit

Bank Management System | August 2023 | [GitHub](#)

- Designed a Java Swing-based bank management system with an ATM-like user interface for account operations.
- Integrated SQL database to handle real-time deposits, withdrawals, balance inquiries, and user data storage.
- Optimized database operations and data processing structures to ensure secure interaction between frontend, backend logic, and database systems.
- **Technologies Used:** Java, Java Swing, SQL

Weather Application | February 2024 | [GitHub](#) | [Live](#)

- Built a responsive web application to display real-time weather information for user-selected cities.
- Integrated an external weather API to fetch live data and update results dynamically on the interface.
- Improved understanding of API requests, responses, and real-time data handling in web applications.
- **Technologies Used:** HTML, CSS, JavaScript, OpenWeather API

SKILLS

Programming Languages & Web Technologies : Python, Java, JavaScript, HTML5, CSS3, React, Bootstrap

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code, npm, Chrome DevTools

Soft Skills: Problem Solving, Team Collaboration, Communication, Adaptability, Agile Methodologies

Certifications: MongoDB Developers Toolkit (GeeksforGeeks), Python for Data Science & AI (IBM), Front-End Development (Meta), Agile Project Management (Google)
